## Installation Precautions:

1. Please read the instructions carefully before installation;

2. Ask a professional electrician to install;

3. In order to avoid the danger of electric shock, please confirm to turn off the power supply before installation and maintenance;

4. Before installing the lamp, please confirm that the mounting surface is firm and reliable to avoid loosening and falling off the lamp;

5. Keep the manual for reference.

Light Installation and Wiring:

1. As shown in Figure 1, take out the mounting bracket on the lamp, drill a hole in the installation position, and install the gecko;Open the accessories bag, install the level on the installation support (for horizontal alignment of the installation support), and fix the installation support with self-tapping screws (pay attention to the direction, one side of the level is close to the ceiling);

2. The installation size between the lamp and the lamp is shown in figure 2;

3. Fix the steel cable on the mounting bracket (3) as shown in the figure;

4. Lamp wiring: Connect the wire according to the label on the lamp wire ④ as shown in the figure (do waterproof treatment at the wiring);

5. Lamp installation: Put the lamp into the installation bracket (align with the gap), then move the lamp to the right, tighten the screws on the side of the lamp with a hex wrench (Φ2.5mm) (Note: a level can be installed on the lamp body for the horizontal direction of the lamp) as shown in the figure 5;

6. Lamp adjustment;Use a hex wrench (Φ4mm) to loosen the adjusting fixing screw of the lamp, and then adjust the lamp to the required position by hand (adjustable 15 °up and down), and then fix the screw.

High-altitude wall wash light A:
X:Y:H=1:1:10
High-altitude wall wash light B:
X:Y:H=1:5:5

③ Fix the lamp steel cable to the mounting bracket

④ Product wiring:
* The non-dimming version of the product has input wire only
* The dimming version of the product has input wire and dimming light
Wire according to the product label
Make the wiring area waterproof

input wire
dim wire

⑤ Install the luminaire in the mounting bracket
(Note the alignment gap)
Then move the light to the right
Lock the fixed stop pay screws

The luminaire is installed in the mounting bracket
move right
Use a wrench to secure the screws

Attention to alignment gap

⑥ Lamps to be adjusted up and down
Loosen the stop pay screw
(The screw does not need to be completely unscrewed)
Tighten after adjustment

lamp can be adjusted up and down by 15 degrees
wrench (Ø4mm)

⑦ Schematic diagram after installation

Specify:

1, the cable is not attached, the waterproof 3-core cable is used, the diameter of the cable is Ø5-Ø9mm(the mark on the connector: Firewire L;Zero line N;Ground wire);

Note:

1. Lamps with damaged glass protective cover need to be replaced during installation;
